BFP5 Vehicle Notes

The note for the SdKfz 8 FlaK88 (Vehicle Note 7) should read,

"† CE DRM is +3 to fire traced through the VCA/TCA. This is shown by "CE: +3 VCA/TCA" on the counter; CE DRM to Indirect Fire is always +1. The Crew is always completely exposed to FP that is not traced through the VCA/TCA (as is the MA) with no CE DRM, and Random SW Destruction applies to the MA; however, the AFV is not considered to be an unarmored target via its superstructure. In other words a hit on the Turret side/rear through the side/rear VCA is always considered to have struck an armored target, but the Crew/MA is always treated as being in an unarmored vehicle."

Russian Multi-Applicable Vehicle Note C (page 10), the 45mm canister value should be 12.

Russian Multi-Applicable Vehicle Note C (page 12), the entry should be 45mm instead of 47mm, and the 45mm canister value should be 12.
